## Colorado Law Project at the University of Denver

In Colorado, as in most states, direct acces to legal information is limited by a number of factors. Some of those factors include the location of law libraries, access to legal collections and databases, ability to pay for fee based services, the sophistication of the information seeker's searching ability, and familiarity and understanding of legal information and processes. Because of these barriers and the nature of today's e-society, many people turn to the Internet for answers. Responding to this need, the University of Denver launched the [Colorado Law Project](#), the premier online gateway to Colorado's legal information and resources for use by the general public.

## The Alumni Volunteer Network Online
