REQUIRED TEXTS

Knapp and Crystal, **Problems in Contract Law: Cases and Materials**, (Little Brown, 8th ed.).

Knapp and Crystal, **Rules of Contract Law**, (Little Brown).

NOT REQUIRED (BUT POTENTIALLY USEFUL) TEXTS

Chirelstein, **Concepts and Case Analysis in the Law of Contracts**. This book provides an informal overview of some of the cases and concepts we'll be discussing. A copy will be on reserve in the library for your use.

Farnsworth, **Contracts**, (Little Brown). This is a treatise on contracts, offering a narrative summary of the major topics. Treatises can be helpful to gain an overview of a subject area. Other treatises include Calamari & Perillo and Murray. If you choose to consult a treatise (and you are under no obligation to do so), you should use the book that is the most clear to you.

GRADING

Your grade for this course will be based on one final examination. There may be additional problems assigned during the semester which will not be graded but which will be considered part of your overall class participation. Class attendance (which is mandatory) and participation may (at my sole discretion) effect your final grade in either direction (i.e., outstanding class participation may boost your grade; poor participation and/or attendance may lower your grade). If you miss more than 20% of scheduled classes, I reserve the right to bar you from taking the final exam. If you know that you

must miss a class for any reason, you must let me know before that class is held. If you cannot let me know before, please inform me afterwards.

ASSIGNMENTS

Assignments will be announced in class. There are no dates listed on the syllabus because class coverage depends on what happens in the classroom—if we need to spend more time on some issues and less on others we will do so. If you wish to read ahead, you should follow the syllabus. The assignments listed are gross estimates of what will be covered; at times it may be necessary to add or delete material. We may not cover all of the material on the syllabus, but it at least allows you to see where we're going. If you miss class and are uncertain of the next assignment, find out from a classmate.

The pages listed in the assignments refer to pages in Knapp and Crystal and are required reading. For each assignment, read and study the pages designated, together with any relevant section of the Uniform Commercial Code (including the comments) and/or the Restatement Second of Contracts referred to in the text. These materials are contained in the supplement Rules of Contract Law. Where appropriate, the assignment also contains references to Chirelstein. These sections are not required reading but may help illuminate your understanding of the cases and concepts. There are problems and review questions contained in each chapter of the casebook. We will be doing some of the problems as a class (as noted in the assignments below). The remainder of those materials are for your review. I am happy to discuss them with you during office hours.
