

★ BRING THIS TRAINING TO YOUR COMMUNITY ★

Planning Active Community Environments (PLACE) Training

The PLACE Training is an in-depth skill-building session on land use planning and community design. This one-day workshop is structured to provide public health professionals and advocates with the knowledge and skills to actively participate in the land use planning and development review process to create "smart growth" active living environments. This training addresses:

- ◆ the relationship between public health and active community environments
- ◆ the history of land use planning and public health
- ◆ Smart Growth principles for active communities
- ◆ key elements of the community planning process
- ◆ the five strategic points of intervention and collaboration between planning and public health

In addition, workshop exercises include:

- ◆ reading a land use plan, zoning code and map
- ◆ reading a development proposal and writing a referral response
- ◆ action planning for your community

This training is intended for public health professionals and other health advocates interested in the relationship between land use planning, community design & health.

PLACE delivered to you!

Are you interested in providing this type of capacity building training to the public health professionals and advocates in your community?

Contact Leanne Jeffers or James van Hemert to explore how the PLACE Training can be brought to you.

This training is a collaborative project of the University of Denver's Rocky Mountain Land Use Institute and the Regional Institute for Health & Environmental Leadership.
