Integrating Water Efficiency Into Land Use: A Reference Manual

This helpful new guide offers land use planners dozens of techniques and sample codes/policies to reduce the water footprint of new development. Produced by Pace University's Land Use Law Center and Western Resource Advocates, this manual is a must-read for any community facing water supply challenges.

The guide focuses on improving water efficiency through the land use process with chapters on:

- The Comprehensive Plan
- The Zoning Code
- Site Plan & Subdivision Regulations
- Sustainability Plans & Programs
- Building Code & Plumbing Code
- Non-Zoning Incentives
- Development Permits & Agreements
- Post-Occupancy Enforcement
